

With its heavenly flavor, September's featured cheese will bring a glow to your eyes. *Full Moon* is one of our French farmstead-style bloomy rind goat cheeses that ripen from dense to creamy, and develops complexity of flavor as it ages. Like the moon, it's beautiful at any phase!

Phases of the Moon

- New:** a soft bloomy rind with a smooth, dense paste
- Half:** a velvet rind holding luscious cream with a silken paste
- Full:** savory cream cradled within a velvety rind

Average weight: 5 ounces*

September

"He should, as he list, be able to prove the moon made of grene cheese."
- Sir Thomas More (1478-1535)

* Note: Because we hand-ladle and hand-pack our cheeses, the individual weights will vary.
